

Connecting schools in Crete with the world of Tourism

What does Tourism mean for the local economy?
How does a chef's day look like?
How do I build my own business?
What is the role of a hotelier?

Professionals from the Tourism industry answer these and many more students' questions from 5 schools in Crete through live sessions. The aim of the project was to inform and develop awareness for a tourism that "sees" beyond the traditional tourism industry standards, as well as to emphasize the value of Tourism as a career path.

The project was implemented with the support of [G & A Mamidakis Foundation](#).
