

TIPPING
THE **POINT**

“Vodafone World of Difference”, Vodafone Foundation

With the participation of the Tipping Point in the “Vodafone World of Difference” program the TTP team had grown! Voula Chrysanthakopoulou worked in the organization for six months as the Operations Manager and was responsible for the implementation of the TTP program in schools across Greece, thus bringing the organization closer to achieving its ultimate goal for 2018. In particular, Voula was responsible for the communication and training of the new educators, who - along with the new schools - would be included in the program, as well as the coordination for the classroom sessions. In addition, she was responsible for searching, training, and coordinating mentors, as well as for the development of collaborations with organizations that would enable TTP to enrich its mentors’ community with more professionals who are passionate about what they do and want to offer their knowledge to young people.

The “Vodafone World of Difference” is a worldwide program of the Vodafone Foundation that has been implemented in Greece since 2010, having nominated until 2018 69 winners who worked in non-profit organizations of their choice in regions all over Greece, such as Athens, Thessaloniki, Drama, Kastoria, Corfu, Kozani, Komotini, Crete, Mytilene, Patra, Paros, and Prespes, offering significant work to the local community.
