

Connecting schools in Crete with the world of Tourism

What does Tourism mean for the local economy?
How does a chef's day look like?
How do I build my own business?
What is the role of a hotelier?

Professionals from the Tourism industry answered these and many more students' questions from 5 schools in Crete through live sessions. The aim of the project was to inform and develop awareness for tourism that "sees" beyond the traditional tourism industry standards, as well as to emphasize the value of Tourism as a career path.

The project was implemented with the support of G & A Mamidakis Foundation.
