

The modern Greek Industry as a career path

The project “**Career opportunities in the modern greek industry**”, enables students from 7 Junior/High Schools in Thiva, Livadia, Chiliomodi (Korinthia), Skiathos, and Chalkida to discover the career opportunities and prospects the modern greek industry offers.

Executives of Cenergy Holdings’ subsidiaries, Hellenic Cables and Corinth Pipeworks, with long years of experience and expertise, become mentors to students from their operating areas, for the second consecutive year.

With their support, young people discover:

- 1.unknown opportunities provided by the existence of industry in their homeland
- 2.the professional and development prospects of the modern greek industry
- 3.the different professions and specialties of the modern greek industry
- 4.the importance of the sector’s development, through the experience of the mentors

An additional main goal of the project is for it to become a means of inspiration for the students, in order for them to envision their professional future in said field, availing themselves of the opportunities it offers.

The project is implemented with the support of **Hellenic Cables** and **Corinth Pipeworks**, subsidiaries of Cenergy Holdings, during the school year 2022-23.
