

Tipping Point, with the support and in collaboration with the Folloe Foundation - in the context of its initiative for the revival of Milies, Ilia - implements two projects with an aim to creating jobs and developing entrepreneurship in the region.

Students and adults will have the opportunity to get in touch with entrepreneurship and professions that can be developed in Milies through the Tipping Point program, and a program of inspirational talks and training workshops conducted by successful professionals and entrepreneurs around Greece. The goal is the inspiration of the locals and the diaspora in order to create ideas and jobs, and revive the village.

Specifically:

Project for Adults

People of Milies will have the opportunity to participate in the “Youtopia Project”, which aims to inspire and mobilize them, as well as to provide knowledge and tools to create new job opportunities and the right conditions to return to their place of origin.

The project is implemented in 3 stages:

- inspirational talks (live sessions) with professionals/entrepreneurs (mentors) across the country, who have operated in the province and share their example to inspire participants,
- entrepreneurship workshops lasting a total of 12 hours to provide practical knowledge on key business issues and enhance business skills in an interactive way,
- group mentoring/guidance in the first steps of those who wish to proceed with the implementation of a business idea.

The project is implemented in collaboration with the organization [Bizrupt](#).

Project for Students

The Primary School, Junior High School and High School of Lala will have the opportunity to participate in the Tipping Point program. The goal is to give students the opportunity to start exploring the natural wealth of their area in business terms and to dream their own future as adult professionals in the place they know better than any else. This is achieved through group live sessions (discussions) with role models (mentors) throughout Greece, in which they participate from the comfort of their classroom.

For the purposes of the 2 projects, has been created a group of specialized mentors (experienced executives, entrepreneurs, etc.) active in various fields such as tourism, agriculture, catering, technology, etc. related to the local economy of Milies.
