

## **MYTILINEOS continues to support and empower students throughout Greece for the third consecutive year.**

During the school year 2021-22, students of 40 schools in cities, villages, and islands of the country, as well as greek schools abroad, meet virtually with professionals from multiple sectors, who, by undertaking the role of mentors, introduce students to the available options for their academic and professional future.

What is more, for the first time this year, these virtual meet-ups have the additional aim of mental empowerment through live sessions with mentors offering advice or tips on anxiety management, during a period of great decisions regarding the students' future.

Since 2019, the program has reached more than 8,000 students in Greece and abroad, while, via the live sessions, more than 3,000 of the students' questions have been answered.

The program is implemented with the support of MYTILINEOS.
