

MYTILINEOS supports and empowers students throughout Greece for the 4th consecutive year

Having supported and empowered more than 8.000 students, irrespective of their location, economic and social status MYTILINEOS continues supporting the implementation of the program The Tipping Point in schools of Greece, as well as greek schools abroad.

For the 4th school year, students from 40 schools meet virtually with professionals from multiple sectors, who, by undertaking the role of mentors, introduce students to the available options for their academic and professional future.

What is more, young people have the opportunity to develop and enhance soft skills such as critical thinking, problem-solving, and creativity, which are of the utmost importance in the contemporary labor market.

The program is implemented with the support of **MYTILINEOS** for the school year 2022-23.
