

## Unexplored Futures 2

The action "Unexplored Futures 2" is implemented in schools in different regions around Greece, aiming to inform and prepare students for the modern labour market.

Through the action, groups of students in Patras, Thessaloniki, Ioannina, Heraklion, Chania, Skiathos, and Piraeus have the opportunity to explore and learn about emerging professions and new career pathways, as well as the skills related to each of them. Dialectica employees, as mentors, undertake informing and training students on soft skills, CV writing, first job interviews, etc. In this way, students explore their career options and prepare themselves for the labour market.

The action is implemented with the support of Dialectica, the information services startup that employs 900+ people globally, 65% of whom are Generation Zeners.
